

Dokumentasjon av litteratursøk for VBP

Til søk for VBP utfører vi søk i de basene som er beskrevet nedenfor, dette etter avtale med Sidsel R. Børmark, Leder Klinisk Dokumentasjon Sykepleie (KDS) - DP Løsning Regional EPJ.

Vi søker i et begrenset antall databaser, de fleste er kilder for oppsummert forskning. I databasene som også inneholder enkeltstudier - PubMed/Medline og SveMed+: vi søker først og fremst etter systematiske oversikter og/eller etter artikler publisert i diverse nordiske sykepleietidsskrifter, se kommentar ved disse basene under.

Problemstilling	<p>Vi har valgt å søke samlet for disse problemstillingene:</p> <p>Februar 2015: Eva Mari Alvestad Harboe Hvordan gi optimal sykepleie til pasienter som blir operert for skjoldbruskkjertelkreft? (Litteratur som kom med på trefflistene forrige gang, er i stor grad med fortsatt).</p> <p>Februar 2017: Liv-Marie E. Loraas og Anne-Kate Esbjug Hvilke per- /intraoperative sykepleieintervensjoner bør tilstrebes for å sikre optimal operasjonssykepleie til pasienter som opereres i thyreoidea (skjoldbruskkjertelen)?</p>
