

Dokumentasjon av litteratursøk for VBP

Til søk for VBP utfører vi søk i de basene som er beskrevet nedenfor, dette etter avtale med Klinisk Dokumentasjon Sykepleie (KDS) - DP Løsning Regional EPJ.

Vi søker i et begrenset antall databaser, de fleste er kilder for oppsummert forskning. I databasene som også inneholder enkeltstudier - PubMed/Medline og SveMed+: I PubMed/Medline vil vi ofte begrense søket til mulige systematiske oversikter/retningslinjer, og i SveMed+ vil vi gjerne begrense søket til artikler publisert i diverse nordiske sykepleietidsskrifter.

Problemstilling	Sykepleieintervensjoner til pasienter som har fått utlagt tarm. Stomiopplæring og mestring av stomi
Bibliotekar som utførte/veiledet søket:	Marie Isachsen
Kontaktperson/avd.	Stine-Lise Skogbakken stlisk@ous-hf.no
Dato for søk:	14. februar 2022 Oppdatering av søk fra 16. april 2018
Navn VBP	Stomi - Pre- og postoperativ

Database/ressurs:	Fagprosedyrer som er lokalt utviklet og godkjent i de enkelte helseforetak (på nettsiden til Helsebiblioteket)
Søkehistorie:	Sett gjennom listene Kreft, Kirurgi, og Mage og tarm
Treff:	Stomi - urostomi, ileostomi og colostomi https://www.helsebiblioteket.no/fagprosedyrer/ferdige/stomi-urostomi-ileostomi-og-colostomi

Database/ressurs:	VAR HEALTHCARE (tidligere PPS - Praktiske prosedyrer i sykepleietjenesten)
Søkehistorie:	Dere ser selv i E-håndboka -> Kunnskapskilder > VAR

Database/ressurs:	Nasjonale retningslinjer fra Helsedirektoratet
Søkehistorie:	Sett gjennom liste
Treff:

Søk 2

Fjernes filteret for mulige systematiske oversikter som er brukt i Søk 1, så gjenfinnes det et stort antall artikler: 1843 pr. 14. februar.

Disse 1843 artiklene ble så avgrenset med [denne søkestrengen](#) som blant annet uttrykker emner hentet fra Pico-skjema, og til siste 4 år.

Søketreffet ble da redusert til **446** pr 14. februar 2022 (425 når vi i PubMed Advanced Search tok vekk de 92 artiklene i Søk 1):
